“March 31, 2009 Quarterly Update”

I. Introduction

This report addresses violations of Waste Discharge Requirements (WDRs) for discharges to surface water during calendar year 2008. Discharges to surface water are issued a combined WDR/NPDES permit. This report updates the tables and figures presented in the Annual 13385 (o) report with data populated in CIWQS as of March 31, 2009 and does not include an analysis of the effectiveness of enforcement policies.

The [NPDES Permit Program](#) controls water pollution by regulating point sources that discharge pollutants into waters of the United States. Point sources are discrete conveyances such as pipes or man-made ditches. Typical point source discharges include discharges from: municipalities or publicly owned treatment works (POTWs), industrial facilities, and urban areas regulated under the Storm Water Program. The NPDES program is delegated to the State Water Board in accordance with the United States Environmental Protection Agency’s approval, and is implemented through Chapter 5.5 of the California Water Code.

The State and Regional Water Boards administer the NPDES program. The nine Regional Water Boards lie within different watersheds and are as follows (see [Appendix A](#) for map and details):

- Region 1 – [North Coast Regional Water Board](#)
- Region 2 – [San Francisco Bay Regional Water Board](#)
- Region 3 – [Central Coast Regional Water Board](#)
- Region 4 – [Los Angeles Regional Water Board](#)
- Region 5 – [Central Valley Regional Water Board](#) (With Offices in Redding [5R], Sacramento [5S] and Fresno [5F])
- Region 6 – [Lahontan Regional Water Board](#) (With offices in South Lake Tahoe [6A] and Victorville [6B])
- Region 7 – [Colorado River Basin Regional Water Board](#)
- Region 8 – [Santa Ana Regional Water Board](#)
- Region 9 – [San Diego Regional Water Board](#)

California Water Code, Chapter 5.5 implements provisions of the federal Water Pollution Control Act and establishes a regulatory program for discharges to surface water. This report summarizes information regarding violations of waste discharge requirements to surface waters pursuant to Water Code, Chapter 5.5, Section 13385(o), and enforcement actions taken by the State and Regional Water Quality Control Boards (Water Boards) in response to those violations.

“March 31, 2009 Quarterly Update”

[California Water Code Section 13385\(o\)](#)

The state board shall continuously report and update information on its Internet Web site, but at a minimum, annually on or before January 1, regarding its enforcement activities. The information shall include all of the following:

- (1) A compilation of the number of violations of waste discharge requirements in the previous calendar year, including stormwater enforcement violations.
- (2) A record of the formal and informal compliance and enforcement actions taken for each violation, including stormwater enforcement actions.
- (3) An analysis of the effectiveness of current enforcement policies, including mandatory minimum penalties.

This is the first quarterly update of the 2008 13385(o) report to meet the requirements to continuously report and update the information. This report only completes and updates the information provided in the 2008 13385(o) report and include only the updates of the information previously reported. Only when the new data requires additional explanation or, the new information suggest changes in the conclusions, analysis and recommendations additional analysis is provided. This report and the supporting metadata are available at the [Water Board's Internet Web site](#).

The Water Boards use the [California Integrated Water Quality System](#) (CIWQS) database to track violations and the resulting enforcement actions. The CIWQS database contains information on violations and enforcement actions that have occurred since July 1, 1999.

Most of the tables in this report are available for continuous public use through the State Water Board's Internet site. Use of live, [public reports](#) allows the public access to violation and enforcement data from all dischargers regulated by the Water Boards, and gives the user control over how to sort and filter this data to meet specific information needs. These public reports can be found on the Water Board's Web site at: http://www.waterboards.ca.gov/water_issues/programs/ciwqs/publicreports.shtml.

“March 31, 2009 Quarterly Update”

II. Violations of Waste Discharge Requirements

This section presents a compilation of the number of violations of waste discharge requirements in the previous year.

NPDES Wastewater

Wastewater facilities discussed in this report are those facilities that are permitted to discharge pollutants to surface waters and include sewage treatment plants, food processors, oil refineries, power plant cooling waters, pulp and paper mills, mining operations, fish hatcheries, etc. During this reporting period, there were 2,069 active wastewater facilities regulated by [NPDES](#) waste discharge requirements in California. These facilities are divided into two categories:

- Major facilities – Facilities with an average daily discharge greater than 1 million gallons per day or those that pose a high degree of threat to water quality;
- Minor facilities – Facilities with an average daily flow less than 1 million gallons per day and that have a lower threat to water quality.

The waste discharge requirements (“NPDES permits” or “permits”) are issued as individual permits or as general permits. Dischargers eligible for coverage under a general permit must enroll and agree to comply with the conditions of the general permit. A summary of active NPDES facilities by category and Regional Water Board is shown in Table 1.

Table 1: NPDES Wastewater Permits by Category and Regional Office

Regional Offices	Major Facilities		Minor Facilities		Total
	Individual Permits	General Permit Enrollees	Individual Permits	General Permit Enrollees	
1	14	21	32		67
2	56	209	18		283
3	22	70	20		112
4	45	481	78		604

6B	2	7	5		14
7	9	38	16		63
8	19	361	18		398
9	37	71	24		132
Total	263	1,433	352		2,048

“March 31, 2009 Quarterly Update”

Table 2 lists the total number of violations of NPDES permits by Regional Water Board office for each of the past nine years. The table shows a generally consistent number of violations statewide although this does not track for all of the Regional Water Board offices. The increase in the number of violations from the year 2003 is in part explained by increased diligence in recording violations.

Table 2: Number of Violations of NPDES Wastewater Permits 2000 to 2008

Regional Offices	2000	2001	2002	2003	2004	2005	2006	2007	2008
1	920	619	420	442	671	442	340	233	341
2	496	510	310	268	281	270	355	242	187

8	398	24	0	116	4.83
9	132	8	3	197	17.91
Total	2,048	446	35	4,607	Average: 9.97

“March 31, 2009 Quarterly Update”

The data in Table 3 indicate an uneven distribution of the average number of violations per facility among the different Regional Water Board offices. The reasons for this variability include differences in facility-specific requirements, differences in Regional Water Board office processes, the priority assigned to report review and data entry, and the differences in rates of compliance among dischargers.

A breakdown of the violation types and the number of violations identified as priority violations is presented in Table 4. A more detailed description of each violation category is provided in [Appendix B](#). Violations vary from not submitting monitoring reports on time to acute toxicity violations. The Water Boards identify priority violations based on criteria identified in the [Water Quality Enforcement Policy](#)¹. A priority violation represents a greater threat to water quality than other violations. Forty eight percent of NPDES wastewater violations have been identified as priority violations.

It is important to note that the term “priority” violation used in this context is different than “serious” violations discussed in the following section on mandatory minimum penalties. The term “serious” violation is defined in sections 13385(h) and 13385.1 of the California Water Code. All “serious” violations are considered priority violations, but not all priority violations are “serious” violations.

Table 4: NPDES Wastewater Violations by Category for 2008

Description of Violation Category (See Appendix B)	Non-Priority Violations	Priority Violations	Total	% of Total
Category 1 Pollutant Reporting	977	724	1,701	37%
Category 2 Pollutant Effluent	419	830	1,249	27%
OEV	135	463	598	13%

“March 31, 2009 Quarterly Update”

NPDES Stormwater

The [Stormwater Program](#) has five categories of dischargers subject to the federal Stormwater permit requirements. At the time of this report, nearly 30,000 facilities or permittees are regulated by NPDES stormwater permits in California. Below is a brief description of the five categories:

- **Industrial Activities** – The Industrial Storm Water General Permit Order 97-03-DWQ ([General Industrial Permit](#)) is an NPDES permit that regulates discharges associated with 10 broad categories of industrial activities other than construction. In general, discharges from manufacturing, transportation, and recycling facilities are subject to this permit.
- **Construction Activities** – Dischargers whose projects disturb one or more acres of soil or are part of a larger common plan of development or sale are required to obtain coverage under the General Permit for Discharges of Storm Water Associated with Construction Activity ([Construction General Permit - CGP - Order No. 99-08-DWQ](#)). Construction activity subject to this permit includes clearing, grading and disturbances to the ground such as stockpiling, or excavation, but does not include regular maintenance activities performed to restore the original line, grade or capacity of the facility. Typical CGP permit coverage lasts about 1 year, so this permit program sees a lot of turnover. Because construction activities are temporary and the most prevalent pollutant problem is sediment discharges, the State Water Board has adopted this permit separate from the General Industrial Permit.
- **Linear Stormwater Facilities** – Underground/Overhead Projects disturbing at least 1 acre but less than 5 acres (including trenching and staging areas) are covered by the Statewide General Permit for Storm Water Discharges Associated with Construction Activity from Small Linear Underground/Overhead Projects ([Small LUP General Permit](#))
- **Municipal Stormwater Phase I Facilities** – The Municipal Storm Water Permits regulate storm water discharges from municipal separate storm sewer systems (MS4s). Under [Phase I](#), which began in 1990, the Regional Water Boards have issued NPDES MS4 permits to permittees serving populations greater than 100,000 people. Many of these permits are issued to a group of co-permittees encompassing an entire metropolitan area.
- **Municipal Stormwater Phase II Facilities** – Under [Phase II](#), the State Water Board adopted a General Permit for the Discharge of Storm Water from Small MS4s (WQ Order No. 2003-0005-DWQ) to provide permit coverage for smaller municipalities (10,000 to 100,000 people), including non-traditional small MS4s which are governmental facilities such as military bases, public campuses, prisons and hospital complexes.

Stormwater permits are generally issued as individual permits to the Phase 1 MS4s and as general permits to the other categories. Dischargers eligible for coverage under a general permit must enroll and agree to comply with the conditions of the general permit.

“March 31, 2009 Quarterly Update”

Table 5 shows active NPDES stormwater facilities by category and Regional Board.

Table 5: NPDES Stormwater Permittees by Permit Type and Regional Office

Regional Offices	Construction	Industrial	Municipal	Total
1	438	357	20	815
2	1,897	1,421	102	3,420

6A	24	32	72	51	78	43	84	23	18
6B	46	74	15	1	0	2	9	10	31
7	52	11	21	0	50	2	1	43	0
8	553	742	390	267	295	502	318	450	353
9	166	300	602	405	389	163	150	203	190
Total	1,589	2,597	2,693	1,890	2,216	2,347	1,746	1,775	1,869

“March 31, 2009 Quarterly Update”

A breakdown of the storm water violations by violation type is shown in Table 7. Approximately, 17 percent of NPDES stormwater violations have been identified as priority violations.

Table 7: NPDES Stormwater Violations by Category for 2008

Description of Violation Category (See Appendix B)	Non-Priority Violations		Priority Violations		Total Number	Total %
	Number	%	Number	%		
Reporting	902	58%	222	71%	1,124	60%
BMP	382	25%	28	9%	410	22%
SWPPP	114	7%	8	3%	122	7%
Other Requirement	55	4%	28	9%	83	4%
Unauthorized Discharge	69	4%	12	4%	81	4%
Monitoring	10	1%	12	4%	22	1%
Failure to Pay Fees	8	1%	2	1%	10	1%
OEV	7	0%	0	0%	7	0%
Sanitary Sewer Overflow	5	0%	0	0%	5	0%
Stormwater Non-filer	3	0%	0	0%	3	0%
Effluent	1	0%	0	0%	1	0%
Category 2 Pollutant	0	0%	1	0%	1	0%
Total	1,556	100%	313	100%	1,869	100%

Most of the violations documented in the stormwater program are reporting violations. Most violations, other than reporting, in the stormwater program are discovered through site inspections. Because ensuring compliance with stormwater NPDES permit requirements for the nearly 30,000 permitted stormwater activities requires a large field presence, most violations are related to the submission of the annual reports.

“March 31, 2009 Quarterly Update”

Compliance and Enforcement at Federal Facilities

Federal facilities include facilities owned or operated by the federal government. These include national parks, Department of Energy facilities, Department of Defense (DOD) facilities, etc.

DOD facilities fall under one of the following three categories:

- Active bases where the military currently conducts operations,
- Base Realignment and Closure (BRAC) installations which are being cleaned up and prepared for transfer to communities and to other federal, state, and local agencies, and
- Formerly Used Defense Sites (FUDS) which are properties that DOD once owned, operated or leased.

Table 8: Federal Facilities Regulated Under the NPDES Program by Region

“March 31, 2009 Quarterly Update”

III. Summary of Enforcement Actions Taken for Violations

This section presents information on formal and informal compliance and enforcement actions taken for each violation.

NPDES Wastewater

Enforcement actions taken in response to violations include both informal and formal actions. An informal enforcement action is any enforcement action taken by Water Board staff that is not defined in statute, such as staff letters and notices of violation. Formal enforcement actions are statutorily recognized actions to address a violation or threatened violation such as Cleanup and Abatement Orders. [Appendix C](#) describes the enforcement options used by the Water Boards.

Table 9: NPDES Wastewater Violations Compared to Completed Enforcement Actions

Regional Offices	2005			2006			2007			2008		
	Total Violations	w/ Enforcement	% w/ Enforcement	Total Violations	w/ Enforcement	% w/ Enforcement	Total Violations	w/ Enforcement	% w/ Enforcement	Total Violations	w/ Enforcement	% w/ Enforcement

6B	14	10	↓ 71%	129	117	↑ 91%	45	25	↓ 56%	22	15	↓ 68%
7	194	176	↑ 91%	275	272	↑ 99%	307	302	↑ 98%	310	307	↑ 99%
8	244	151	↓ 62%	163	101	↓ 62%	128	106	↔ 83%	116	39	↓ 34%
9	138	108	↓ 78%	170	156	↑ 92%	319	220	↓ 69%	197	143	↓ 73%
Total	6,625	4,263	↓ 64%	7,554	5,130	↓ 68%	6,765	4,623	↓ 68%	4,607	3,256	↓ 71%

↑	More than 90% of violations with completed enforcement
↔	Between 80% and 90% of violations with completed enforcement
↓	Less than 80% of violations with completed enforcement

Table 9 shows the number of violations recorded from 2005 to 2008. It also lists the number of violations for which there is a completed enforcement action entered in CIWQS (enforcement is still pending for some, but not all, of these violations). The percentages at the bottom of the table show each violation category as a percentage of the total number of violations and the percentage of violations linked to an enforcement action. While the Water Boards' enforcement authorities are significant, resource levels generally preclude enforcement against every violation. The appropriate level of enforcement response is described in the Water Board's [enforcement policy](#).

“March 31, 2009 Quarterly Update”

As noted, there can be a significant lag in the time between the discovery and reporting of a violation, and the resulting enforcement action. This is due to available staffing and the time it takes to pursue enforcement, particularly for complex enforcement cases. Also, minor violations may be resolved before enforcement is taken. As a result, the percentage of violations where enforcement has been taken is lower for more recent violations, and tends to increase as time goes by and additional actions are taken for past violations. The data for 2008 will likely change significantly since not all violations have yet been recorded for 2008.

NPDES Stormwater

Table 10 shows the number of stormwater violations for the last four years. It also lists the number of stormwater violations addressed by enforcement actions. The percentages at the bottom of the table show the total number of violations receiving enforcement as a percent of the total number of violations.

Table 10: NPDES Stormwater Violations Compared to Completed Enforcement Actions

Regional Offices	2005			2006			2007			2008		
	Total Violations	w/ Enforcement	% w/ Enforcement	Total Violations	w/ Enforcement	% w/ Enforcement	Total Violations	w/ Enforcement	% w/ Enforcement	Total Violations	w/ Enforcement	% w/ Enforcement

2	8	4	↓ 50%	7	6	→ 86%	294	288	↑ 98%	239	233	↑ 97%
3	456	453	↑ 99%	62	60	↑ 97%	60	55	↑ 92%	61	53	→ 87%
4	286	270	↑ 94%	229	204	→ 89%	142	131	↑ 92%	234	233	↑ 100%
5F	309	295	↑ 95%	249	245	↑ 98%	13	12	↑ 92%	190	166	→ 87%
5R	51	49	↑ 96%	84	83	↑ 99%	72	70	↑ 97%	74	71	↑ 96%
5S	521	508	↑ 98%	548	536	↑ 98%	378	361	↑ 96%	379	367	↑ 97%
6A	43	18	↓ 42%	84	77	↑ 92%	23	11	↓ 48%	18	10	↓ 56%
6B	2	1	↓ 50%	9	0	↓ 0%	10	8	→ 80%	31	14	↓ 45%
7	2	2	↑ 100%	1	1	↑ 100%	43	42	↑ 98%	0	0	NA
8	502	452	↑ 90%	318	269	→ 85%	450	422	↑ 94%	353	331	↑ 94%
9	163	133	→ 82%	150	114	↓ 76%	203	181	→ 89%	190	171	↑ 90%
Total	2,347	2,185	↑ 93%	1,746	1,600	↑ 92%	1,775	1,655	↑ 93%	1,869	1,740	↑ 93%

↑	More than 90% of violations with completed enforcement
→	Between 80% and 90% of violations with completed enforcement
↓	Less than 80% of violations with completed enforcement

Table 10 shows a very high enforcement response rate, much higher than in Table 9 for wastewater reporting. This is due in part to the fact that these violations are often entered into the database at the same time the enforcement action is entered into the database.

“March 31, 2009 Quarterly Update”

IV. Mandatory Minimum Penalties (MMPs) Update

Summary of MMP Violations and MMP Enforcement Actions

According to the CIWQS database, 23,890 MMP violations occurred between January 1, 2000 and March 31, 2009. Of these, 18,446 (77 percent) are recorded as having received a minimum or greater penalty. Some portion of the reported effluent violations may qualify for statutory exemptions.

Table 11 shows the number of violations that have been identified by each Regional Water Board office by violation type. [Appendix D](#) provides a list of every facility with violations subject to mandatory minimum penalties.

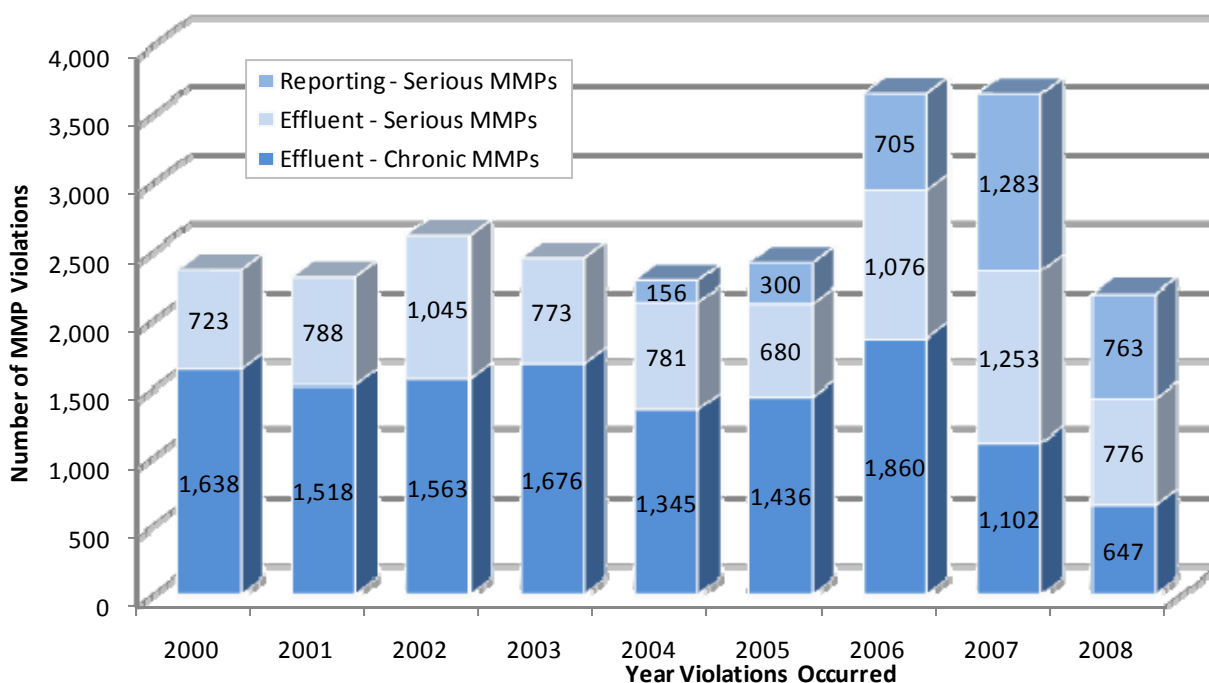

Table 11: Status of Violations Subject to MMPs from January 2000 to March 2009

Regional Offices	Effluent		Reporting	Total
	Chronic MMPs	Serious MMPs	Serious MMPs	
1	913	554	140	1,607
2	955	851	1	1,807
3	556	258	2	816
4	4,124	2,948	1,687	8,759

7	688	399	0	1,087
8	899	133	3	1,035
9	504	409	0	913
Total	12,786	7,896	3,208	23,890

“March 31, 2009 Quarterly Update”

Figure 1 shows MMP violations since 2000 by violation type. We see a variation through the years. There is significant increase in the count of violations in 2006 due to the greater emphasis on documentation of serious violations for late reports, especially within the Los Angeles Regional Water Board as a result of implementation of the statewide initiative for MMP enforcement. MMPs for late reports began in 2004 with the addition of section 13385.1.

Figure 1: NPDES Wastewater MMP Violations 2000-2008

“March 31, 2009 Quarterly Update”

Table 12 shows the number of violations that are being addressed through the enforcement process by Regional Water Board office.

Table 12: Status of Violations Subject to MMPs from January 2000 to March 2009

Regional Offices	MMPs Addressed with Administrative Civil Liability (1)	MMPs Resolved with Court Order	MMPs Addressed with Expedited Payment Offer (2)	Violations without Completed MMP Enforcement	% Without	Total
1	1,521	0	14	72	4%	1,607
2	1,377	0	39	391	22%	1,807
3	618	22	73	103	13%	816
4	1,773	3,031	3,609	346	4%	8,759
5F	1,172	0	0	3	0%	1,175
5R	167	0	0	3	2%	170
5S	5,963	7	0	401	6%	6,371
6A	0	0	0	6	100%	6
6B	82	0	0	62	43%	144
7	863	0	0	224	21%	1,087
8	938	0	0	97	9%	1,035
9	884	28	0	1	0%	913
Total	15,358	3,088	3,735	1,709	7%	23,890

- (1) MMP Addressed with ACL" which includes both pending ACL activities triggered by a complaint and completed ACL activities resolved with an ACL order or settlement.
- (2) Expedited payment offer issued under the 2008 MMP initiative. The term "addressed" means that some action has been initiated regarding the MMP violation, not that the violation has been resolved.

“March 31, 2009 Quarterly Update”

Table 13 lists the number of facilities in each Regional Water Board office that have one or more MMP violations, the number of facilities for which MMPs have been issued for all MMP violations, and the number of facilities that would require at least one enforcement action to cover any outstanding MMP violations. As shown, 187 or more enforcement actions would be necessary to cover the 1,709 violations remaining subject to MMPs. This is a significant improvement from the 491 actions needed at the beginning of calendar year 2008.

**Table 13: Facilities with MMP Violations and Pending Enforcement Actions
January 2000 to March 2009**

Regional Offices	Facilities with all MMP penalties issued	Facilities with pending MMP penalties	Total
1	23	10	33
2	38	31	69
3	16	14	30
4	229	66	295
5F	20	1	21
5R	12	3	15
5S	41	34	75
6A	0	2	2
6B	1	2	3
7	3	18	21
8	13	5	18
9	21	1	22
Total	417	187	604

Since January 2000, approximately 500 facilities received an enforcement action addressing mandatory minimum penalties. Of the 500 facilities that received an enforcement action, 385 facilities or 77% have not reported any violations that are subject to MMPs since the enforcement action was issued.

“March 31, 2009 Quarterly Update”

Figure 2 displays the distribution of facilities by the number of MMP violations with and without completed enforcement. The numbers indicate that of the 604 facilities that incurred in MMP violations, 308 or 54% have incurred ten or fewer MMP violations, and 154 facilities or 27% have more than fifty MMP violations each.

Figure 2: Distribution of Facilities by Number of MMP Violations

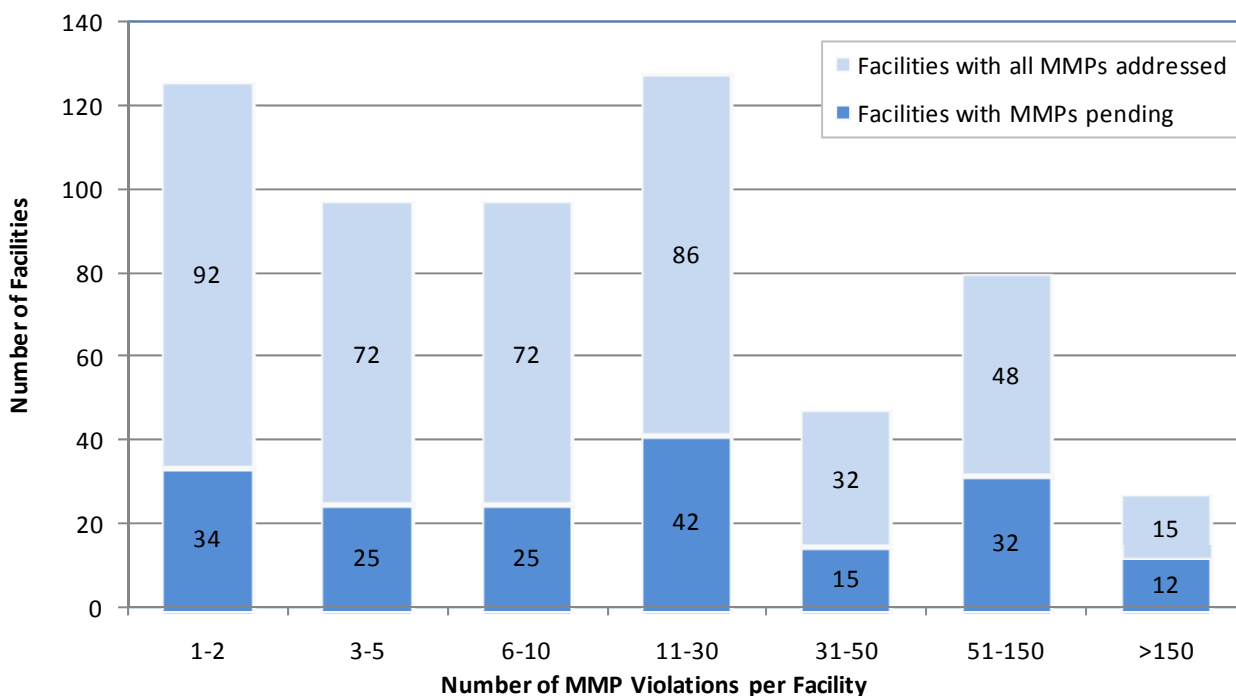

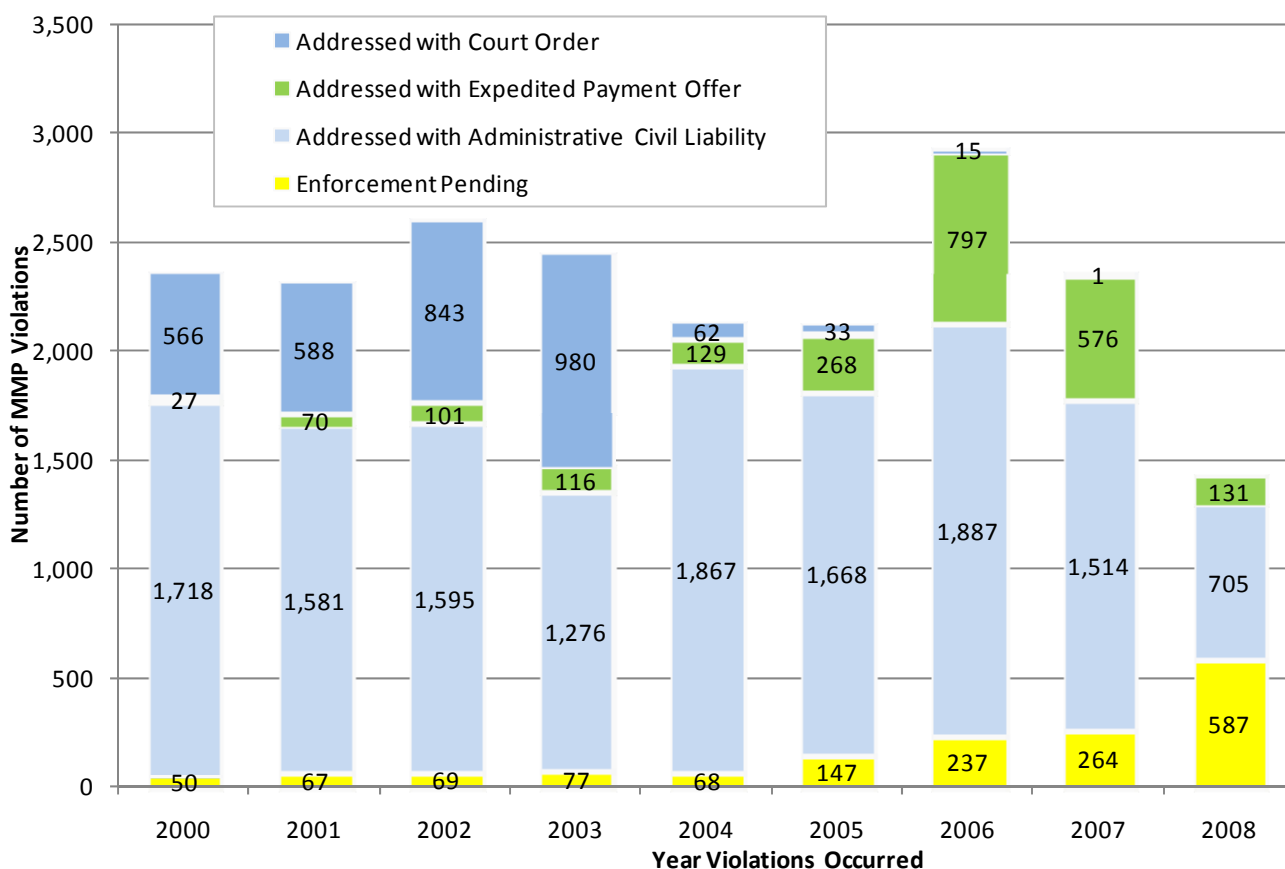

Figure 2 also reveals that the percentage of facilities with all MMPs addressed varies depending on the number of MMP violations per facility. Approximately 26% of facilities with 1-10 MMP violations still have pending MMP violations to be addressed compared to 44% of facilities with more than 151 violations each.

“March 31, 2009 Quarterly Update”

Enforcement of Mandatory Minimum Penalties on Effluent Violations

Early trends in MMP violations indicated an overall reduction in the number of violations at NPDES facilities. We believed that the reduction was partly a result of increased compliance due to the deterrent effect of MMPs. Data for 2003 and 2004 showed an increase in violations, but we believe this is partly due to an increased emphasis on recording and collecting these mandatory penalties. Additionally, the introduction of MMPs for reporting violations in 2004 put a greater emphasis on reviewing and tracking all such reports. The Regional Water Boards generally prioritize MMP issuance to facilities with greater compliance problems because of the staff costs associated with issuing ACLs. While MMPs were intended to be a streamlined process for penalty issuance, these penalties are often challenged by dischargers and can consume as much staff time as an ordinary ACL complaint assessing discretionary penalties.

Figure 3: NPDES Wastewater MMP Effluent Violations 2000-2008 by Enforcement Type

“March 31, 2009 Quarterly Update”

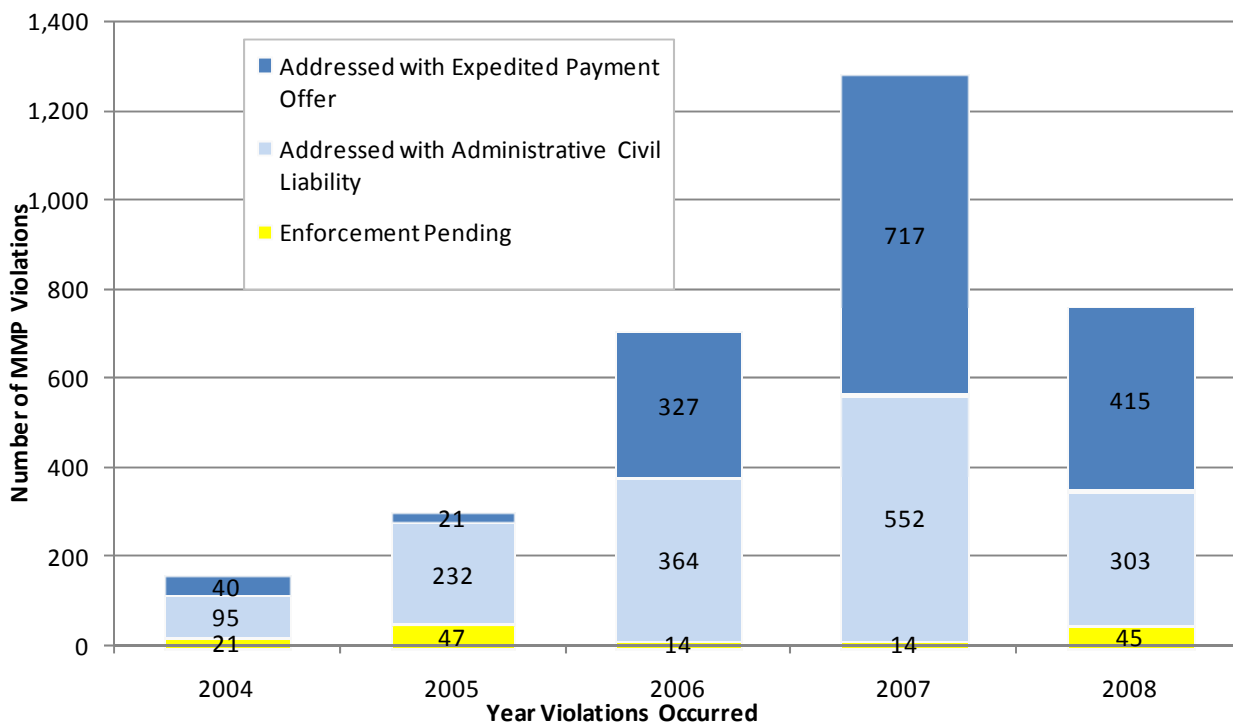

Enforcement of Mandatory Minimum Penalties on Serious Late Reporting Violations

Prompt and complete submission of self monitoring reports is a priority for the Water Boards because monitoring reports are the main instrument to ensure compliance with effluent limits and monitoring requirements in NPDES permits.

Compliance rates for reporting violations vary significantly among regions and type of dischargers. Typically most major dischargers submit their monitoring reports on time.

Figure 4 displays the distribution and number of reporting violations over time and with the level of enforcement received.

Figure 4: NPDES Wastewater Late Report Serious Violations 2004-2008 with Level of Enforcement Received

“March 31, 2009 Quarterly Update”

Compliance Rates for Major Facilities

One of the most important performance measures for the Water Board’s enforcement program is the compliance rate with requirements. Of special significance, because of their threat to water quality is the compliance rate for NPDES Wastewater Major Facilities. Figure 5 shows that compliance rates among Major NPDES wastewater facilities are improving overtime. Not only has the total number of Major facilities with violations recorded been reduced but the number of facilities with more than 25 violations during the year has seen a significant reduction, going from 31 in the year 2000 to only 14 in 2007 and 16 in 2008. Figure 5 displays the distribution of the number of NPDES major facilities with no violations, the number of facilities with one to 10 violations, the number of facilities with 11 to 25 violations and the number of facilities with more than 25 violations.

Figure 5: Number of NPDES Wastewater Major Facilities 2000-2008. Compliance Rates

“March 31, 2009 Quarterly Update”

VI. Recommendations and Actions for Future Reports: UPDATE

- To improve data quality and consistency in data entry, the Office of Enforcement is planning an enforcement data project to identify and prepare a plan of correction to address all issues related to enforcement data.

Update: On February 18 the State Water Board sponsored an Enforcement Data Summit to discuss with the regional board enforcement coordinators and CIWQS coordinators the data gaps and data needs. The group will meet and discuss enforcement related data issues on a quarterly basis.

- The Office of Enforcement will prepare a comprehensive report on the 2008 Statewide Initiative for MMP Enforcement.

Update: The Office of Enforcement is currently preparing the comprehensive report.

- Update information to meet the requirements of sections 13385(o)(1) and 13385(o)(2) on a quarterly basis.

Update: This report is currently being updated quarterly and a process to streamline the necessary data is in place.

- Conduct an analysis of the effectiveness of current enforcement policies, including mandatory minimum penalties by individual regional board office.

Update: A plan to meet this requirement is under development.

- Develop measures to evaluate the impact of mandatory minimum penalties on compliance, deterrence and recidivism.

Update: A set of measures is under development.

- Develop the necessary tracking systems to measure the environmental benefits gained as a result of an enforcement action.

Update: Changes to information systems are currently being proposed.

- Include with this report, at the State Water Board public web site, the metadata that supports the numbers provided in this report.

Update: This report includes the [metadata](#) at the Water Board web site.

Appendix B: Listing and Description of Violation Types Used in the CIWQS Data System

Category 1 pollutant – Category 1 pollutants as defined by USEPA include:

<u>Oxygen Demand</u> Biochemical Oxygen Demand Chemical Oxygen Demands Total Organic Carbon Other	<u>Detergents and Oils</u> MBAS NTA Oil and Grease Other detergents or algaecides
<u>Solids</u> Total Suspended Solids (Residues) Total Dissolved Solids (Residues) Other	<u>Minerals</u> Calcium, Chloride, Fluoride, Magnesium, Sodium, Potassium, Sulfur, Sulfate, Total Alkalinity, Total Hardness, Other Minerals
<u>Nutrients</u> Inorganic Phosphorus Compounds Inorganic Nitrogen Compounds Other	<u>Metals</u> Aluminum, Cobalt, Iron, Vanadium

Category 2 pollutant – Category 2 pollutants as defined by USEPA:

Metals (all forms) - Other metals not specifically listed under Group I

Inorganics - Cyanide, Total Residual Chlorine

Organics - All organics are Group II except those specifically listed under Group I.

Other effluent violation – Any violation of an effluent requirement not cover under Category 1 or Category 2.

Chronic Toxicity – Violation of a chronic toxicity effluent requirement.

Acute Toxicity – Violation of an acute toxicity effluent requirement.

Violation of Non-effluent Permit Condition – Violation of any permit condition not pertaining to effluent requirements.

Reporting – Late report, failure to submit a report, or a report that is either not complete or contains errors.

Monitoring – Failure to conduct required monitoring

Compliance schedule – Failure to comply with a compliance schedule in a permit. This does not include schedules in an enforcement order likes a Cease & Desist and Time Schedule Orders.

Sanitary Sewer Overflow – Any spill from a sanitary sewer collection system or pump station.

Unauthorized Discharge – Any discharge other than allowed by WDRs that is not a sanitary sewer overflow.

Unregulated Discharge – Discharge from a site not currently under WDRs.

Groundwater – Any release to groundwater that violates permit conditions or basin plan prohibitions.

BMP – Failure to implement proper best management practices.

SWPPP – Failure to complete or update a stormwater pollution prevention plan.

Failure to obtain permit – Failure to obtain the appropriate permit prior to discharge or regulated activity.

Other Codes – Violations of codes sections other that the California Water Code.

Enforcement Action – Failure to comply with a previous enforcement order by not meeting its requirements, its time schedule, or failure to pay penalties.

Basin Plan Prohibition – Violation of any basin plan prohibition.

Appendix C: Types and Classification of Enforcement Actions

Type of Enforcement Action	Description	Classification
Expedited Payment Offer	A conditional offer that provides a discharger with an opportunity to resolve any outstanding violations subject to mandatory minimum penalties by acknowledging them and providing full payment of the accrued mandatory penalties identified in the payment letter	Informal
Verbal Communication	Any communication regarding the violation that takes place in person or by telephone.	Informal
Staff Enforcement Letter	Any written communication regarding violations and possible enforcement actions that is signed at the staff level.	Informal
Notice of Violation	A letter officially notifying a discharger of a violation and the possible enforcement actions, penalties, and liabilities that may result. This letter is signed by the Executive Officer.	Informal
Notice to Comply	Issuance of a Notice to Comply per Water Code Section 13399.	Formal
13267 Order	A letter utilizing Water Code Section 13267 authority to require further information or studies.	Formal
Clean-up and Abatement Order	Any order pursuant to Water Code Section 13304.	Formal
Cease and Desist Order	Any order pursuant to Water Codes Sections 13301-13303.	Formal
Time Schedule Order	Any order pursuant to Water Code Section 13300.	Formal
Administrative Civil Liability (ACL) Complaint	ACL Complaint issued by the Executive Officer.	Formal
Administrative Civil Liability (ACL) Order	An ACL Order that has been imposed by the Water Board or SWRCB.	Formal
Settlement	A settlement agreement per California Government Code Section 11415.6.	Formal
Referral	Referral to the District Attorney, Attorney General, or USEPA.	Formal
Referred to a Task Force	Any referral of a violation to an environmental crimes task force.	Formal
Referral to Other Agency	Any referral to another State Agency.	Formal
Third Party Action	An enforcement action taken by a non-governmental third party and to which the State or Water Board is a party.	Formal
Waste Discharge Requirements	Any modification or rescission of Waste Discharge Requirements in response to a violation.	Formal
